7.	Project Name : BOPEE J & K.		
Client	BOPEE Govt. of Jammu and Kashmir.		
Organization	J &K Board of Professional Entrance Examination.		
Role	Team Member	**Duration**	(07/2009) – 02/2010
Environment ASP.Net 3.5	**Software Tools:** Visual Studio 2008, Ajax, Java script, Flash, WCF, SQL Server 2005		**Languages :** C#, SQL, XML **Database :** SQL 2005 **Technologies :** .Net 3.5 **O/s :** Windows XP

Project Description
The Jammu and Kashmir Board of Professional Entrance Examinations, earlier Competent Authority Entrance Examinations, is entrusted with the task of conducting entrance examinations for granting admission to various undergraduate and postgraduate professional courses in the State. The Board has been executing this task fairly and efficiently since its inception. The Web Portal for J & K BOPEE caters to the needs of the aspirants, who can access the portal for various courses/programs offered by the board and the detailed information for each course/program.

The student community-aspirants for various entrance examinations- are especially benefited. They can easily access information concerning entrance examination related matters on internet at places convenient to them. They can register and pay the examination fees online. The website also facilitates and increases the interaction and communication between the functionaries of the Board and the students.
Contribution
As a team member, was responsible for
- Analysis and understanding of the specifications provided by the clients.
- Interacting with client for getting the clarifications of Business functionality.

- Development of the Portal components.
- Implementation of the modules related to the educational and business operations.

6.	Project Name: iControl USA.		
Client	Mr. Jonathan Cashper, MVP iControl USA.		
Organization	iControl USA.		
Role	Team Member	Duration	(07/2008) – (04/2009)
Environment .Net 3.5	Software Tools: Visual Studio 2008, Java script, WCF SQL 2005, Commerce Server 2007.		Languages : C# Database : SQL 2005 O/s : Windows XP

Project Description

Providing retailers, their newspaper vendors (distributors) and publishers a cutting-edge, definitive, web-enabled solution, comprehensively encompassing all aspects like item-file set-up & maintenance, allocation management, sell-out prevention, promotions & billing. With over 8,000 active accounts including CVS/pharmacy and Barnes & Noble, iControl by a ratio of more than 2:1, is the largest provider of newspaper billing consolidation services in North America. Emphasis is on providing Software as a service (SaaS). SaaS is an application delivery model where the S/W vendor (in this case iControl) develops a web-native software application, hosts and supports the application for use by the customers over the Internet, who only pay for using it and not owning the software itself.

Contribution

As a team member, was responsible for
- Analyzing and understanding the specifications provided by the client.
- Designing the Web Client workflows using UML tools.
- Web Client development for the system which is used by Retailers, Distributors and iControl users.
- Plan, Enhance, Design, Develop, Test and Document besides liaising with the client.

5.	Project Name : IBS (Investment Banking Simulator)		
Client	Mr. Neil Palmquist.		
Organization	The Legacy Group USA.		
Role	Team Member	Duration	(04/2008) – (07/2008)
Environment .Net 2.0	Software Tools : DotNetNuke SQL Express		Languages : C#, VB Database : SQL 2005 O/s : Windows XP

Project Description

The Investment Banking Simulator is the real-world, employment and job assignment simulator for the Investment Banking Industry... both in practice and accountability. Users (business graduates or MBA's) have the opportunity to learn, build experience, and master the skills commensurate of the industry's entry level analyst position, as an industry analyst, before ever setting foot in an investment bank.

Contribution

As a team lead, was responsible for
- Understanding and developing the concept of project.
- Interacting with client for getting the clarifications of Business functionality.
- Workflow Development using UML.
- Designed and implemented the complete project.
- Coding using DotNetNuke, C#, VB and SQL 2005.

4.	Project Name : Hindustan Times Web Portal hindustantimes.com
Client	HT Media Group KG Marg, CP New Delhi.
Organization	HT Media Group KG Marg, CP New Delhi.

Role	Developer	**Duration**	(06/2007) – (04/2008)
Environment .Net 3.5	**Software Tools :** Visual Studio 2005, Commerce Server 2007, Java script, SQL server 2005.		**Languages:** XML, C#. **Database :** SQL 2008 **O/s:** Windows XP, Windows 2003 Server.

Project Description

The hindustantimes.com has been awarded the best news site for technology usage by PC World in May 2007. Hindustan Times Portal is a global site attracting more than a million visitors per month, and uses innovative Web 2.0 techniques and products. It uses Microsoft's most Innovative technologies like Commerce Server 2007, SQL Server 2005, BizTalk Server 2006, and .Net technologies – C# and ASP.Net. It has been completed in Phases under the auspices of Microsoft's Senior Consultants.

The system is categorized into following four integrated systems. Each of these is detailed out in the rest of the document.

■ Content Authoring System (CAS) – the content authoring environment for HT editorial team.

■ Content Delivery Engine (CDE) - the end-user facing website delivery engine.

■ Reporting system – reports on user activity, CAS auditing, and system-level metrics.

■ Data-integration system – for exchanging information with partner agencies and SAP system.

Contribution
As a team member, was responsible for
- Analyzing and understanding the specifications provided by the client.
- Working on development of CDE (the end-user facing website delivery engine) modules like Columns, Surveys, Interviews, Polls etc.
- Coding using C#, .Net 2.0, Commerce Server 2007 APIs, and XML.
- Documenting and designing the user level test cases and testing the functionalities of the system with client supplied inputs.
- Working on client side as a system analyst.

Other Project Details:
